Profile

I am Full Stack Developer with over 2 year of experience in web development and a solid background in Computer Engineering. I enjoy working on challenging projects that allow me to learn and grow. My commitment to excellence and continuous improvement drives me to seek effective and efficient technical solutions.

Professional Experience

Developer Full Stack   2023 – present
Freelance
- Payment Gateway Integration: Worked closely with national payment service providers and international to integrate payment gateways into your website. As a result of this implementation, we experienced a notable 20% increase in the number of successful transactions. Tech stack: **JavaScript**, **Node.js**, **Express.js**, **MySQL**, **Stripe**.
- Design and Development of an Authentication System: I developed a secure authentication system that requires users to generate and use tokens to access their accounts. This solution significantly improves the security of authentication on the website. Technologies used: **JavaScript**, **Node.js**, **Express.js**, **React.js**, **MySQL**, **JWT**.

Developer Full Stack Jr   2022 – 2023
Mate - Consultora de Software
- Development and maintenance of web applications using technologies such as **HTML**, **CSS**, **JavaScript**, **React.js**, **Node.js**, **Express** and **MongoDB**.
- Design and development of efficient and scalable database structures for web applications and systems, including the implementation of **SQL** queries.
- Design of attractive and responsive user interfaces, optimizing the user experience and improving the usability of the final products
- Troubleshooting and debugging

Education

Computer Engineering   2020 – present
Universidad Nacional de La Matanza

Certificates

- Universidad Java - De Cero a Experto ⊘
- The Complete 2023 Web Development Bootcamp ⊘
- Universidad Desarrollo Web - FrontEnd Web Developer! ⊘

Projects

To Do List ⊘
Node.js, Express, MongoDB, Bootstrap
- Web application with user registration that allows you to keep track of the to do list
- User authentication and registration
- Use of non-relational database to store user information and task list

Shop Shoes ⊘
React.js, Chakra UI, Express.js
- Web application that allows price comparison across various online stores by consuming an API
- Facilitates comparison of different footwear retailers, empowering users to make informed economic decisions and potentially save 10% - 20% on their purchases

Languages

Spanish   Nativo

English   B2

Skills

- Communication
- API REST
- JavaScript
- Node.js
- MongoDB
- Github
- Teamwork
- MVC
- TypeScript
- Java
- MySQL
- Jest
- Troubleshooting
- HTML5
- React.js
- Spring Boot
- PostgreSQL
- Docker
- Object Oriented Programming (OOP)
- Css
- Express.js
- Microsoft SQL Server
- Git
